

Kiara Rodriguez

ENG 201-05

Unit 3 Reflection

Professor Olivia Wood

December 9, 2020

1. What do you feel like you learned this unit that you didn't know before?

What I feel I learned from this unit that I didn't know before is, how to properly conduct a research study article. I also learned all the important steps that are needed when conducting a research study article such as abstract, introduction, method, results, discussion, and conclusion.

1. What did you already know , but now understand better or learned more about?

What I already knew was the basic elements of a research study article, but now I understand better how to properly lay out all of these elements in an article and make sure to have a good transition. I also knew how to make up a regular research experiment on any topic, but I now learned how to use my imagination more by creating an imaginary experiment.

2. What (if anything) do you feel like I **wanted** you to learn, but you still aren't sure about?

Something that I feel like I wanted to learn but i'm still unsure about is what to specifically include in certain sections such as the discussion and methods section. I wish there would've been more information on those specific parts.

3. What are the strengths of your final project article? What are you most proud of?

Some of the strengths of my final project article is that even though I invented an experiment from the show Riverdale it still corresponds to the real world and it's very understandable. What I'm most proud of is the way I chose to prepare/lay out my article, I think I did it in a way where the reader understands exactly what my experiment is going to be about, why, and the results.

4. If you were to revise your final project article, what would you want to do differently?

If I were to revise my final project article something that I would do differently is probably go more into depth on the background of the show in the introduction. This is something that I would do differently because I think it would make it easier to understand for someone who hasn't watched Riverdale before.

5. How would you describe or rate your participation/engagement in this unit?

How I would describe or rate my participation/engagement in this unit would be a 10/10. I would give myself a 10/10 because I participated in a timely manner and I made sure that my peer review partners got my paper in on time, and also that I go in their peer review reports and my feedback in on time as well. Also, I made sure that all of my papers were handed in on time, apart from this reflection.

6. What did you do this unit that helped make you successful?

What I did in this unit that helped make me successful is that I organized myself in a timely manner. I made sure to get everything in by the due dates as best as I could, and I made sure to complete my work to the best of my ability.

7. What (if anything) do you want to do differently in the next unit?

I don't think that there is anything I would do differently in the next unit. I don't think that there is anything differently I would do in the next unit because I think I was very creative in this unit, and I'm satisfied with my work in this unit.

8. Please complete the sentence: "This class would be better if....."

This class would be better if zoom class was mandatory. I think this class would be better if zoom class was mandatory because I think it will help students like me engage more. When classes give a lot of optional choices, it makes procrastinators like me more difficult to engage in class.

9. For you, how did this unit compare to the News Unit and/or the Humanities Unit?

This unit compared to the News Unit/ the Humanities Unit was much more interesting and easier for me. I think this unit was much more interesting and easier for me because I was more creative in this unit than in the previous ones, which made the writing process flow better.

10. What (if anything) from this unit would you like to discuss/think about/explore further? (either this semester or just in your life)

Something from this unit that I would like to discuss/explore further is how to become better in writing scientific articles, and how to have a more precise article.

11. What would you like to see in the remaining weeks of the semester?

What I would like to see in the remaining weeks of the semester is more examples of others works, and more creative writings.
